Contents of Volume 28 (1988)

Vol. 28, No. 1

Extremum principles and exact two-side bounds of potential: Functional and dissipation for slow motions of nonlinear viscoplastic media
A.I. Leonov (Stanford, CA, U.S.A.) 1

A non-Newtonian model of flow in a kneading disc region of a modular intermeshing corotating twin screw extruder
W. Szydlowski and J.L. White (Akron, OH, U.S.A.) 29

Anomalous elongational flows and change of type
D.D. Joseph and K. Chen (Minneapolis, MN, U.S.A.) 47

An extended thermodynamic approach to non-Newtonian fluids and related results in Marangoni instability problem
G. Lebon (Liège, Belgium) and A. Cloot (Bloemfontein, South Africa) 61

Orientation effects in extensional and squeezing flows of certain anisotropic fluids
B.R. Duffy (Glasgow, Scotland, United Kingdom) 77

Stability of the interface in two-layer Couette flow of upper convected Maxwell liquids
Y. Renardy (Blacksburg, VA, U.S.A.) 99

Short Communication
On the Rayleigh problem for a viscoelastic fluid
N. Phan-Thien and Y.T. Chew (Sydney, N.S.W., Australia) 117

Vol. 28, No. 2

Squeeze-film flow of a viscoelastic fluid. A lubrication model
N. Phan-Thien (Sydney, N.S.W., Australia) and H.T. Low (Singapore) 129

A numerical analysis of calendering
R. Zheng and R.I. Tanner (Sydney, N.S.W., Australia) 149

Nonlinear viscoelastic behavior of aqueous detergent solutions
T. Shikata and H. Hirata (Niigata, Japan), E. Takatori and K. Osaki (Kyoto, Japan) 171

Rheological behavior of rubber carbon black compounds in various shear flow histories
S. Montes, J.L. White and N. Nakajima (Akron, OH, U.S.A.) 183

Draining thin films. Part 1
A.M. Keeley (Ormskirk, Lancashire, Great Britain), G.K. Rennie (Wirral, Merseyside, Great Britain) and N.D. Waters (Liverpool, Great Britain) 213

Dynamics of non-Newtonian fluid interfaces in a porous medium: Compressible fluids
H. Pascal and F. Pascal (Alberta, Canada) 227

A contour integral approach to some cavity flows of elastic fluids
C.J. Coleman (Wollongong, N.S.W., Australia) 239

Short Communication
The effect of weak elasticity on Couette flow between rotating cylinders: (1) Spiral flow; (2) Eccentric cylinders
W.M. Jones (Penglais, Wales, United Kingdom) 255

Corrigendum 265

Vol. 28, No. 3

Flow of dilute polyacrylamide solutions through a sudden planar contraction
A.M. Wunderlich, P.O. Brunn and F. Durst (Erlangen, F.R.G.) 267

Draw resonance in film casting of viscoelastic fluids: A linear stability analysis
N.R. Anturkar and A. Co (Orono, ME, U.S.A.) 287

Pressure-hole errors – An alternative approach
R.I. Tanner (Sydney, NSW, Australia) 309

An extension of the Curtiss–Bird theory for the rheological properties of concentrated polymer solutions and melts
B.J. Geurts (Enschede, The Netherlands) 319

General results on the flow of chopped fiber compounds in compression molding
D.A. Caulk (Warren, MI, U.S.A.) 333

Analytic results for viscoelastic flow in a porous tube
R.G. Larson (Murray Hill, NJ, U.S.A.) 349

Non-isothermal radial filling of center-gated disc activities with viscoelastic polymer melts
S.K. Goyal, E. Chu and M.R. Kamal (Montreal, Que., Canada) 373
